

# ILHIE Direct Secure Messaging Solution

Improve Patient Care, Save Time and Lower Costs

Share test results with your patients

## Exchange Clinical Information Securely With or Without an Electronic Health Record (EHR) System

Did you know email and faxing are not secure ways to exchange protected health information? That's why thousands of health care professionals in Illinois are exchanging electronically with HIPAA compliant ILHIE Direct.

## All You Need is the Internet

To use ILHIE Direct all you need is an Internet connection, a web browser and a communication partner with a Direct address with which to securely exchange patient health information. You do not need an Electronic Health Record (EHR) system.

## Improved Patient Information When you Need it Most

You can securely exchange clinical information in real time such as clinical care summaries, referrals, transition of care documents and images. Most importantly, you'll have this information **before** your patient arrives. This provides for more quality time with patients and reduces the need for patients and providers to continuously fill out duplicate forms with various providers.

Lutheran Social Services of Illinois' mobile workers have eliminated redundant work and medical documents arrive at the hospital, before the patient arrives in the ambulance during a crisis

All staff members involved in care may use ILHIE Direct
